

# RouteLynx

Official Companion Application for Visual On-Route

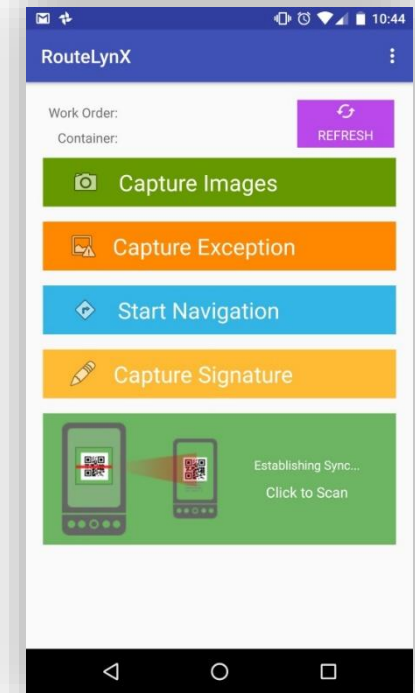

Alpine Technology presents the ultimate companion to its industry leading in-cab computing system, Visual On-Route. No longer do you have to worry about all the issues that go with camera integration and upkeep. Capturing images, exceptions, and signatures has never been easier on your Android device.

## What can RouteLynx do for you?

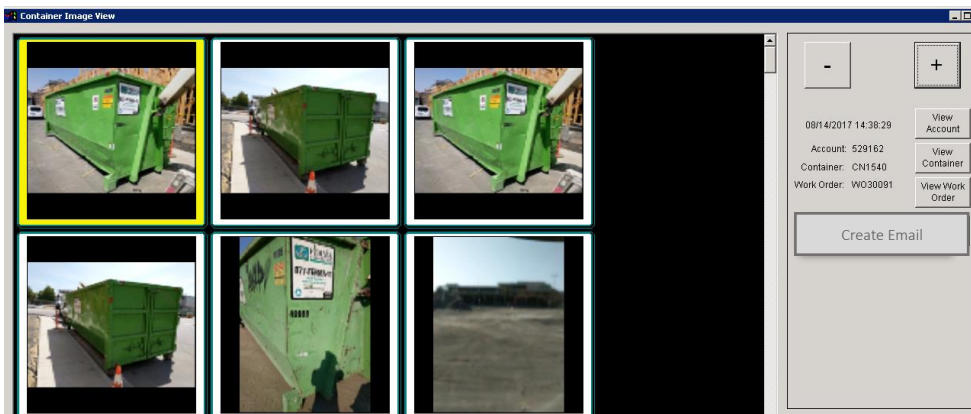

- ✓ Take images of damaged containers and link to appropriate Work Order or Customer account.
- ✓ Record exceptions like extras, hazardous material and other types of content.
- ✓ Use the RouteLynx navigation function to ensure you have the correct directions to the service.
- ✓ Capture signatures on site that will link to the appropriate Work Order.

## Also...

- Free RouteLynx download available on the Play Store
- Compatible with Android version 4.4 or later
- Routelynx is synced to the VOR tablet in the cab of the truck
- Seamless, real-time integration with RouteLynx and the office and Visual RAMS-Pro

## From the Visual RAMS-Pro RouteLynx plug-in you can:

- Pull up the account from the image.
- Pull up the Container.
- View the Work Order.
- See where the image was taken so you can show where the bin was when picture was taken.
- Click on image and send email with image attachment.
